Amir Parsa Rabiei

AI / Security Engineer · Quantitative Finance

amirparsarabii@gmail.com | amirinit.github.io | GitHub | ResearchGate

PROFILE

Researcher and systems engineer interested in machine learning, cybersecurity, quantitative finance, and the infrastructure behind reliable systems. Experience includes AI consulting and security operations, alongside research in language, networks, and computer vision.

PROFESSIONAL EXPERIENCE

AI Consultant | Deep Nex — 1402–1403 SH | approx. 2023–2025

Artificial intelligence consulting and advisory work.

SOC Engineer | Arka — 1401 SH | approx. 2022–2023

Security operations work within a Security Operations Center (SOC).

SH denotes Solar Hijri calendar years; Gregorian years indicate the approximate calendar span, not exact employment dates.

SELECTED RESEARCH

BERTCaps: BERT Capsule for Persian Multi-Domain Sentiment Analysis
Co-authored study combining BERT and capsule models; reported 97.12% sentiment and 85.09% domain classification accuracy on Persian Digikala reviews. 2024. arXiv · ResearchGate

A Survey of Generative Adversarial Network on Next Generation Network
A survey of generative adversarial networks and their applications in next-generation networks. ResearchGate

Deep Face Identification Using Incomplete Facial Data
Research on facial recognition with partial image data; International Congress of Science and Engineering, Japan. Title translated from Persian. Paper record

RECOGNITION & MEDIA

First place, IRAN CTF — national cybersecurity competition, 1402 SH. ISCA News

Second place, Khwarizmi Youth Festival — provincial student project recognition, 1396 SH. PANA

Cybersecurity and information protection — interview with ANA News Agency. Interview

FOCUS & EDUCATION

Focus: Machine learning, quantitative finance, security operations, Linux and systems, Python, Rust, containers.
Education: Software engineering studies, Islamic Azad University, Hamadan.
